Pablo **Cebollada Hernández**

BACKEND SOFTWARE ENGINEER

paabloo.ch@gmail.com| +34 655072165| Barcelona, Spain| linkedin.com/in/pablo-cebollada-hernández| pablocebollada.dev

Skills

Languages:	Kotlin, Java, C++, C#, TypeScript, JavaScript, SQL
Frameworks:	Spring Boot, React, Angular, Nuxt, Vue
Databases:	MySQL, PostgreSQL, MongoDB
Technologies / Tools:	Git, Docker, AWS, Jira, Optick, SonarQube
Practices:	SOLID Principles, TDD, Agile/Scrum

Experience

Desico

April 2025 – Present

Software Engineer — San Cugat, Spain

- Developed backend services for an AWS-hosted facility management platform using Kotlin, Spring Boot and PostgreSQL, deployed across 20+ client environments.
- Reduced data-query and map-rendering latency by 60% by optimizing database queries and introducing multithreaded parallel processing while ensuring thread safety.
- Developed two production modules for GIS device geolocation and CCTV/security system visualization (Vue frontend, C# backend), used by all clients.

Horizons Games

March 2023 – November 2024

Software Engineer — Barcelona, Spain

- Developed a graphics engine for 3D scene visualization and model rendering.
- Led rendering-system optimization efforts, diagnosing and eliminating a VRAM memory leak that caused several GB of VRAM growth during long-running sessions.
- Refactored core engine components for thread-safe execution and implemented a custom thread pool.

IThink UPC

February 2022 – February 2023

Software Engineer — Barcelona, Spain

- Implemented an authentication system using short-lived access tokens. Add expiration/session validation details only if you actually implemented them.
- Implemented an image compression/decompression algorithm, reducing storage space and processing time by 40–70%.

Projects

ChironDX

https://github.com/PaablooCH/ChironDX

Developing a 3D game engine from scratch in C++ using DirectX12 for custom shader-based rendering.

Deep-Shop

https://github.com/PaablooCH/Deep-Shop

Game prototype in C#, including a quest and crafting system, event-driven architecture, and automatic save/load.

Education

Universitat Politècnica de Catalunya - UPC BarcelonaTech - Talent School

2022 – 2023

Master in Advanced Programming

Universitat Politècnica de Catalunya - UPC BarcelonaTech

2017 – 2022

Degree in Computer Science
